Technology and Disability 27 (2015) 173–174
IOS Press

Keyword Index Volume 27 (2015)

activity monitoring 17
ADL 91
areas of concern 141
assistive technology 5, 17, 31, 161

Binaural Cochlear Implant 51
binaural signal processing 51
Braille transliteration 65

co-creation 5

deaf 127
dementia 91
design process 79
disability 79
dynamic stability 155

elderly population 141
EMG 41
everyday activities 141

fall detectors 31
file reader 65
French phonemes recognition 51
front target 51

hard hearing 127

IADL 91
information provision 31
information systems 141

late onset visual impairment 103
living labs 5
long cane 103

mild cognitive impairment 91
mobility 79
model 103
multilanguage 127

noise angle 51
noise reduction algorithms 51

old age 17
older people 31
one arm drive wheelchairs 41

paraplegia 79
pressure 119
pressure mapping 119
product design specifications 79

quality of life 141

resolution 119
reverse transliteration 65

safety 103
sampling 119
sensor 119
service delivery system 161
service design 5
shoulder pathology 41
smart technologies 141
spinal cord injury 155
stigma 103
subtitle 127
symbol 103

tactile converter 65
technology 91
telecare 31
TTML 127

unobtrusive monitoring 17
user engagement 5
user influence 161

visual impairment 65
vocoder coding 51
voice based e-mail 65
