

# CONFERENCE PROGRAMME

**Thursday 3 May 2001**

## Plenary

### **Professor Edward H Shortliffe**

Professor and Chairman, Department of Medical Informatics, Columbia University, New York City  
*Networking Health: Prescriptions for the Internet*

### **Dr Astrid van Ginneken**

Erasmus University, Rotterdam, The Netherlands  
*Pros and cons of medical record structures for capture, consultation and extraction of patient data*

### **Dr Heather Heathfield**

Manchester University, Senior Consultant IT Perspectives Ltd  
*The Evaluation of Clinical Decision Support Systems*

## Scientific Sessions

### Medical Informatics

*Modelling of the Visual Sleep Stage Scoring Procedure by a Modular Algorithm Based on Elements of Artificial Intelligence - Artisana*

Matthias Schwaibold, B Scholler, T Penzel, A Bolz

*Evaluating the Accuracy of Intelligent Systems Designed For Medicine*

Ann E Smith, Sally McClean, Chris Nugent

*Intelligent Algorithm to Counting and Classification of Cells*

Allan De Medeiros Martins, A D N Duarte, A M Brito, A Sales, S Jane

*Building Bayesian Belief Networks to Express the Cause and Effect Relationship for Dietary Intake and Pregnancy*

Roy Sterrit, D A Bell, A H Marshall, A Moore, P R Flatt, M J Eaton-Evans, D Mccance

*Predicting Patient Survival Using Bayesian Belief Networks*

Adele Marshall, S I Mcclean, P H Millard, C M Shapcott

*An Internet-Based Project All-Net: Technology Of Scientific Collaboration*

Alexander Martynenko, Xavier Pastor, Dominique Biarent, Francis Leclerc, Oleg Medvedev, Joan Iglesias, Joseph Di Carlo

## Tissue Engineering and Artificial Organs

*Artificial Myocardial Tissue (AMT); A Novel Contractile Engineered Heart Muscle*

Theo Kofidis, MD, P Akhyari, U Martin, J Boublik, P Theodorou, A Ruhparwar, T Kraft,  
H P Kubis, B Brenner, G Gros, A Haverich

*Development of Pulsatile Bioreactor for the in vitro formation of tissue engineered heart valves*

Kris Dumont, P Segers, S Vandenberghe, B Meuris, J Yperman, W Flameng, P Verdonck

*Endothelialization of cardiovascular grafts Polydimethylsiloxane content affects adhesion and growth of endothelial cells onto polyurethane grafts*

Giorgio Soldani, E Briganti, P Losi, I Martinelli

*Characterisation of cardiac assist devices*

Stijn Vandenberghe, P Segers, D De Wachter, P Verdonck

*Hemodynamic aspects of Ventricle Assist Device*

Idit Avrahami, S Einav, M Rosenfeld, K Affeld

*Flow Visualization - Experiments with a geometrically-optimised vortex blood pump*

Clare E Canal, A M Anderson, J R Shanebrook

## Medical Imaging 1

*Machine vision and texture analysis for the automated identification of tissue pattern in prostatic neoplasia*

James Diamond, Neil H Anderson, Peter H Bartels, Rodolfo Montoroni, Peter W Hamilton

*List-Mode Iterative Reconstruction for SPECT*

Luc Bouwens, M Koole, Y D'Asseler, S Vanderberghe, R Van de Walle, I Lemahieu

*Segmentation of Hippocampus From MR Images Using Geometric Models*

Jan Klemencic, MSC, Vojko Valencic, Nuška Pecaric

*Skull smearing effect on event related potentials investigated with a resistor mesh model*

Xavier Franceries, B Doyon, B Rigaud, J P Morucci, P Celsis, B Doyon

*Three-dimensional geometric sensitivity correction in triple-headed gamma camera coincidence imaging: Separability properties*

Yves D'Asseler, Stefaan Vandenberghe, Michel Koole, L R Bouwens, Rik Van de Walle, Ingace Lemahieu, Rudi A Dierckx

*Correction for the varying detection efficiency in gamma camera based coincidence detection*

Steffan Vandenberghe, Y D'Asseler, R Van De Walle, I Lemahieu, R A Dierckx

## Computers in Medicine

*Animated Uroembryology: The millennium modality*

H C Godbole, J P Hermon, T H Lynch

*A Labview Program for measuring Auditory Evoked Potentials*

J M Jimenez-Martínez, F J Gil, J Roca, J A Alvarez

*First clinical experience with a personalised titanium membrane for bone reconstruction in tumour surgery*

Veerle Pattijn, I Samson, J Vander Sloten, R Van Audekercke, B Swaelens, V De Buck

*The Application of Pressure Mapping Techniques to Evaluate Commercially Available Pressure Relief Cushions*

May Stinson, Alison Porter-Armstrong

*Introducing a Clinical Information System: Re-engineering Patient Care in Cardiac Surgery*

Fran Hegarty, Gery Boyle, Mary O'Connell, Barry Fanning, Kate Bentley, Tom Ryan,

Ailish McGovern

## Biomaterials

*Determination of the Quality of Calcium Phosphate Bioceramics*

Adrian Boyd, M Akay, B J Meenan

*Modification of medical implants by plasma immersion ion implantation*

Robert Sader, S Mändl, D Krause, H F Zeilhofer, G Thorwarth, B Raushenbarch

*The effects of sub optimal doses of mitomycin C on transitional cell carcinoma*

H C Godbole, T H Lynch, N H Anderson, S R Johnston, P F Keane, P W Hamilton, K Arthur,

K E Williamson

*The role of electrical properties and surface energy on the biocompatibility and haemocompatibility of Si-DLC films*

Thomas Okpalugo, A Ogwu, P Maguire, J McLaughlin

*Control of Surface Morphology in Calcium Phosphate Thin-Films Deposited by Sputter Deposition*

Brian J Meenan, M Akay, A Boyd

## Medical Imaging 2

*Multidimensional Images of Medical Data by Mathematical Registration Methods*

Wolfgang Hauck, H F Zeilhofer, Z Krol, E Keeve, R Sader, K H Hoffmann, C Ganter, E Rummeneay,

N Avril, M Schwaiger

*Detection of Glutathione in the Human Brain in vivo by Means of Double Quantum Coherence*

*Magnetic Resonance Spectroscopy*

Dieter Meier, P Boesiger, U Dydak

*Study of the Quantification of FBP ECT Images with a correction for partial volume effects*

Michel Koole, R Van de Walle, K Van Laere, Y D'Asseler, S Vandenberghe, I Lemahieu, R A

Dierckx, L R Bouwens

*An Interpolation of RI Image by Means of 2D Interpolating Digital Filter*

Janusz Pawel Kowalski

*Image Processing in Artificial Human Vision Systems*

Justin Boyle, Anthony Maeder, Wageeh Boles

**Friday 4 May 2001**

**Plenary**

**Prof Shankar Subramaniam**

University of California, San Diego

*Bioinformatics: At the Crossroads of Biology, Engineering and Medicine*

**Professor Jan H van Bommel**

Erasmus University, Rotterdam, The Netherlands

*Computer Interpretation of the ECG: Representation for Decision Support in Medicine*

**Professor J McC Anderson**

University of Ulster, Northern Ireland

*Cardiac Mapping as an Effective Tool in the Early Diagnosis of Acute Myocardial Infarction*

**Scientific Sessions**

Technology for Assessment and Homecare

*Application of Image Analysis to Detection of Tubercle Bacilli in Stained Human Sputum*

Patrick Felle, D Fitzgerald, T Murray, P Dervan, D O'Shea

*Ultrasonic Velocity of Uterine Tumours*

V R Singh, Kirti (Ghandhi) Bhatia

*Assessment of Leg Ulcer Color Images Through Digital Image Processing*

Andres Anobile Perez, Adilson Gonzaga

*Development of a multimedia software application to help carers cope with caring problems*

Mary Chambers, S Connor, M McGonigle, M Diver

*Technology to enhance the quality of life of family carers: the ACTION project*

Lennart Magnusson, M Chambers, H Berthold, E Hanson, L Brito, T Daly

*An IT Approach to the Control and Management of Medication in the home; Requirements Analysis*

Chris Nugent, N D Black, P Fiorini

Biosignals, Biosensors and Bioinformatics

*Solving the direct problem of a nonlinear impedance equivalent circuit model*

Jacques Jossinet, Eric T McAdams

*Nonlinear Dynamics - From Conformons to Human Brain*

Włodzimierz Klonowski, E Olejarczyk, R Stepień

*Cellular separation by dielectrophoresis*

Josep Samitier, R Casanella, O Ruiz, M Carmona, A Juárez, J Bausells, A Errachid

*Potentiometric method for Triglycerides Determination*

Dorota G Pijanowska, W Torbicz

*Design of a urethral multi-electrode impedance probe*

Jacques Jossinet, Emmanuel Marry

*Analysis and Interpretation of Complex HPLC/MS Spectra for Drug Discovery*

Huiru (Jane) Zheng, S McClean, P C Ojha, N D Black, J G Hughes, C Shaw

## Cardiovascular System

*Multi Layer Perceptron for the Prediction of Ventricular Repolarisation in Function of the Changes of Heart Rate*

Rajai El Dajani, M Miquel, M C Forlini, P Maison-Blanche, J Fayn, P Rubel

*Non-invasive analysis of haemodynamics in adolescents at rest and during exercise*

Koen Matthys, Patrick Segers, Henri Verhaaren, Pascal Verdonck

*Pulse Wave Velocity Measurement – The Deformation of Arterial Wall Incurred by Pulsatile Flow*

David Leitermann, Lubomír Poušek, Petr Volhejn, Michal Tota, Svatava Konvišková

*A method of left heart ventricle contractility investigation*

Juliusz L Kulikowski, Malgorzata Przytulska, Diana Wierzbicka

*An Implantable Monophasic/Biphasic Atrial Defibrillation System Using Transcutaneous RF Power Delivery*

Jose A Santos, G Manoharan, N E Evans, J McAnderson, B J Kidawi, J D Allen, A A Adgey

*A new approach to the holter events classification based on application of wavelet neural network*

Ewaryst Tkacz, A Wrześniowski, P Kostka

## Expert and Decision Support Systems

*Automated Explanation of Attribute Relevance in Decision-Tree Induction*

David McSherry

*Blood dynamics control in anaesthesia by complex systems engineering*

Aldo Esposito, P Costa, M Magliulo

*Prediction models for the design of neural networks for myocardial infarction classification: A genetic programming approach*

Jesus A Lopez, C D Nugent, A E Smith, N D Black

*A computer-based training system for breast fine needle aspiration cytology.*

James Diamond, Neil H Anderson, Deborah Thompson, Peter H Bartels, Peter W Hamilton

*Continuous Wavelet Transforms reveal the rich structure of ventricular fibrillation*

Paul Addison, James N Watson, Gareth R Clegg, Colin E Robertson, Michael Holzer, Fritz Sterz

## Rehabilitation

*From medical specifications to switching control implementation for a training and rehabilitation machine for the lower limbs*

Janan Zaytoon, L Afilal, S Moughamir, N Manamanni

*Combined magnetic and electric stimulation of peroneal nerve*

Eugene Coyle, Prof Annaraoi de Paor, Dr Carl Murray, Mr P Murray, D Curley

*Robotic orthosis improves treadmill training of paraplegic patients*

Gery Colombo, Reinhard Schreier, Volker Dietz

*Influence of walking speed, stride length and posture on ground reaction vertical force during human gait*

Julio Cesar Politti, Xavier Savatier, Jean-Yves Ertaud

*Responsibilities and involvement of players in the development of successful medical products*

Chris J Snijders, I P M Griffioen-van Dijk, E Vlaaderen, C D Augustijn

#### Instrumentation and VR

*Study of Magnetic Three-Dimensional Localizer for Endoscope*

Huiru (Jane) Zheng, D Lin, X Chen, J G Hughes, N D Black

*PathFinder: a new Image Guided Robot for Neurosurgery*

Patrick A Finlay

*Instrumentation and algorithms for monitoring cognitive task performance*

Paul J McCullagh, R Howard, Lim Ai Lian, C Misir

*Application of CNC Milling and Reverse Engineering for the Manufacture of Titanium Cranioplasty Implants*

Wesley McKnight, J Winder, B Lewis

*The idea of virtual lungs application to ventilatory support testing*

Maciej Guc, T Golczewski, M Kozarski, M Darowski

#### **Saturday 5 May 2001**

##### **Plenary**

##### **Professor Michael Brady**

Professor of Information Engineering, University of Oxford

*Image Analysis for the Diagnosis and Treatment of Breast Cancer, Quantitative Analysis of Cardiac Ultrasound and Degenerative Brain Disease*

##### **Professor David Hawkes**

Guy's Kings and St Thomas' Hospitals Medical Schools, London

*Image Registration, including non rigid applications*

##### **Dr Andrew Barr**

Director, Marturion Ltd

*Innovative Medical Instrumentation: an Industrial Perspective*

## Scientific Sessions

### Telemedicine

#### *A Framework to Support 3D Telemedicine Applications*

Heather Sayers, S Wilson, M D J McNeill

*Development of a High-Performance ISDN to ATM Telemedicine Gateway in Support of the NCI All Ireland Cancer Consortium*

Kenneth M Kempner, D Chow, J E Elson, F S Govern, M E Steele, R L Martino

*A compression-decompression client-server architecture supporting the progressive transmission of medical images included in web-documents*

A Salomie, R Deklerck, J Cornelis

*Computer Supported Collaborative Medical Diagnosis*

Hyxia Villegas, Guillermo Montilla, Ana Aguilera, Basel Solaiman, Raphel Pacheco, Fabian

Cardenas, Jose Quintero, Antonio Bosnjak

*Communication Reliability in Home-Care Telemetry using the 1800 MHz GSM Network*

Stelios Troulis, N E Evans, W G Scanlon

*A New image Compression Method for Telemedicine Using Statistical Characteristics of Wavelet Coefficients*

Hou Wensheng, Wu Baoming, Peng Chenlin

### Cardiovascular Biomechanics

#### *The Effects of Arterial Wall Remodelling on the Wall Shear Stress Distributions in Vascular Bypass Grafts*

Thomas O'Brien, Michael Walsh, Tim McGloughlin

*Mathematical model of the cardiovascular mechanics*

Alexander Martynenko, B Kantor, M Yabluchansky

*Finite element analysis to quantify tissue prolapse within three designs of cardiovascular stents*

Caitriona Lally, F Dolan, P J Prendergast, T C Lee, D Quinn

*Application of Neural Networks to flexible solid state Ion Selective Sensor Arrays for the Detection of Myocardial Ischemia*

Norbert Pilz, Mark Hyland, James McLaughlin, Eric McAdams

*A completely magnetically Ievitated Axial-Flow Blood Pump: results from pre-clinical applications*

Johannes Müller, Ali Kilic, Yo-gou Weng, Peter Nüsser, Hans-Erhard Peters, Kurt Graichen, Andreas

Arndt, Werner Neumann, Georg Konstas, Jörg Müller, Hendrik Heinze, Jan Hoffmann, Tobias

Merkel, Conrad Kauffeldt, Peter Göttel, Frank Deus, Ines Goebel, Roland Hetzer

*Experimental Evaluation of the Migration of Aortic Stent Grafts*

Liam Morris, Timothy McGloughlin, P Delasus

## Biomedical Processing and Modelling

### *Application of Bioimpedance to in vivo breast cancer detection*

Nicolas Chauveau, P Martel, S Freitas, B Rigaud, J P Morucci

### *Determination of EEG activity propagation during voluntary finger movement*

Katarzyna J Blinowska, J Ginter Jr, M Kamiński

### *In vivo measurement of the skull conductivity: EIT versus SEP/SEF*

Sonia Isabel Gonçalves, J C de Munck, J P A Verbunt

### *Automatic Detection of Sleep Stages using the EEG*

Peter Van Hese, W Philips, J De Koninck, R Van de Walle, I Lemahieu

### *Mathematical model of autonomic nervous systems*

Alexander Martynenko, M Yabluchansky, B Kantor

### *Construction of a model of the torso for ECG problems based on CAD tools and images of the human body*

Cesar Navarro, J Anderson, J Allen, J Toro, J Riddell, A A J Adgey

## Technology for People with a Disability

### *Espastics Filtering Interface for Technical Aids Switches. A hardware approach*

Joaquin Roca Dorda, J Roca Jr, A Mateo, J A Villarejo

### *Tele-homecare in an urban area utilising commercially available technology*

Suzanne Martin

### *Phone Communication by Means of Synthetic Speech for Deaf-Mute People*

Dariusz Wloskowicz, K Lukaszewicz, K W Radecki

### *Creative Interfacing - The Development of appropriate assistive technologies for real-time music performance*

Michelle McCormack, C D Nugent, R J Davis, N D Black

### *ESOT Radio frequency beacon systems as the mobility aid for the blind*

Konrad Lukaszewicz, J L Kulikowski, D Wloskowicz, K W Radecki, W Kazubski, T Buczkowski

## Bone and Joint Biomechanics

### *Changing of the micro-mechanical properties of bone after x-ray irradiation*

Hans-Joachim Hein, I Eckardt, S Henning, F Syrowatka

### *Microcrack Accumulation during Fatigue Testing of Compact Bone*

Fergal J O'Brien, D Taylor, Clive T Lee

### *Hardness and elasticity modulus of bone compartments of the femur head measure by microindentation*

Hans-Joachim Hein, R Wolff, W Fräenzel, P Grau

### *Multiaxial Fatigue of acrylic bone cement*

Patrick Prendergast, B P Murphy

### *Reconstruction of zygomas with medical image based, custom made PMMA implants*

Geert Jans, J Vander Sloten, R Gobin, G Van der Perre, M Mommaerts, K Wouters

## Cardiovascular Imaging and Instrumentation

*New Method of Transesophageal Signal Filtering During Noninvasive Electrophysiological Study of the Heart Conductive System*

Kazimierz Peczalski, D Wojciechowski, Z Niedbalski, M Kowalewski, P Sionek, G Skoczylas, M Stopczyk

*Application of Optoelectronic Methods in Monitoring of Chemical Sympathectomy*

Piotr Lukasiewicz, A Liebert, W Raciborski, W Staszkiwicz, R Maniewski

*Near Infrared Spectroscopy for Monitoring of Cerebral Oxygenation During Carotid Surgery*

Roman Maniewski, A Liebert, A Gabrusiewicz, A Zbień, D Gawlikowska, W Staszkiwicz

*Scanning Electrical Conductivity Interfaces by Means of Ultrasound in Magnetic Field*

A Montalibet, J Jossinet, A Matias

*Design of Speckle Denoising Filter using Wavelet-Based Thresholding for Medical Imaging Application*

Su Cheol Kang

## **Posters**

### Health Information Systems

*Coronary Tree Modelling with Iterative Function Systems using a genetic algorithm*

Jesus A Lopez, C D Nugent, N D Black

*An electro-oculogram based human-computer interface for the disabled*

Jesus A Lopez, N D Black, C D Nugent, KI Ziri-Castro

*A human-computer interface to assist in the development of musical devices for physically impaired students*

Chris Nugent, R J Davies, N D Black, M McCormack

*Quantum Informatics*

Mark McCartney, D Glass

*Optimization of the Thermal Protective Clothing using a Knowledge Bank Concept and a Learning Expert System*

Laure Schwenzfeier, B Warne-Janville, G Delhomme, A Dittmar

*Image Display Management for Telecare Applications*

Fionn Murtagh, Mohsen Farid

*The Learning and Teaching Support Network - Promoting Innovation and Good Practice in Health and Medical Informatics*

Sylvia Alexander, Margaret Sills, Megan Quentin-Baxter

*A neural network prediction model to assist in the design of myocardial infarction classifiers*

Chris D Nugent, J A Lopez, A E Smith, N D Black

*Barriers To Evidence Based Practice - The dependence on medical informatics*

George Kernohan

*Home Control System for the Social Integration of Disabled People*

Joaquin Roca Dorda, Jose A Vera, Manuel Jimenez

## Bioengineering

*A comparative study of three techniques for QRS cancellation in the ECG*

Omar J Escalona, M A Diaz, A I Hernández, F Mora

*Medical image based personalised tibial component: biomechanical evaluation*

Veerle Pattijn, J Vander Sloten, R Van Audekercke, B Swaelens, G Isaac

## Medical Imaging & Instrumentation

*The Design of a Compact, Multi-element Test Object for Use in Monte Carlo calculations in diagnostic radiology*

Jing Ning, K Cranley, S McClean

*Medical engineering technologies for diagnosis and correction of higher mental function in children and adolescents*

Evgeni Matveev, V A Viktorov, G I Kavalero

*DSC (Digital Scan Converter) - Error-Free Beamforming Method for Ultrasound Imaging*

JaeSub Hwang, Tai-kyong Song

*Application of indicator dilution method for non-invasive cardiac output measurement*

Maciej Guc, Artur Szczepanski, Jacek Jastrzebski, Tadeusz Palko, Andrzej Ksiazkiewicz

*Limits of spline interpolation in event related potential mapping*

Nicolas Chauveau, X Franceries, B Doyon, B Rigaud, J P Morucci, P Celsis

*Selected algorithms for the computer analysis of microscope scans in the system for early detection of the urinary bladder cancer*

Pawel Jaszczak, A Dulewicz, A Nechaj, D Pietka

*Digital HDTV for Improved Image Quality of Endoscopes*

Peter Niederer, J Häfliger, P Blessing, Y Lehareinger, D Doswald, N Felber

*The New Approach to Evaluation of Vasovagal Syncope Patients Treated by Pacing of the Heart*

Kazimierz, Peczalski, Darius Wojciechowski, Piotr Sionek, Marek Kowalewski

*Localization of Component Parts of Retinal Images*

Fionn Murtagh, Mohsen Farid
