From the Editor

As I finish writing this *From the Editor*, around the globe occupational therapy practitioners and students are celebrating World Occupational Therapy Day (WOTD). WOTD was created by the World Federation of Occupational Therapists (WFOT), “… the international voice of the occupational therapy profession …” (http://www.wfot.org/AboutUs/WorldOTDay.aspx) to provide an opportunity to heighten the public’s awareness of occupational therapy’s distinct value. I am happy to share that *WORK* partnered with WFOT to host the WFOT Virtual Exchange (#WFOTVX), a one hour webinar presented by WFOT President Marilyn Pattison with invited guests from the Kazakhstan Ergotherapy Association. You can listen to Marilyn’s presentation by going to the wfot.org website. We always look forward to collaborating with other organizations and welcome you reaching out to us if you have any recommendations for other alliances.

This issue of *WORK* contains 13 articles on topics such as the work activity as an interface among different logics: the case of distributing food in a university restaurant; understanding salutogenic approaches to managing intensive work; predicting presenteeism via effort-reward imbalance and dispositional optimism; social enterprises and sustainable employment for people with mental illness; and an ergonomic intervention to relieve musculoskeletal symptoms of assembly line workers at an electronic parts manufacturer in Iran among other interesting topics. This issue also includes a Sounding Board article on *The Office Changes Leading to Sit to Stand Ergonomics.* We hope that you have been enjoying our webinar series, Learn at WORK. If you missed any of the webinars, you can find the recordings at the Learn at WORK YouTube channel: https://www.youtube.com/channel/UCOJalCXvSg9fPHaFFs48PuQ
