2015 • ISBN: 9788179935736  
Pages: 172 • Binding: Paperback  
Size: 140 × 220 mm • Price: ₹250.00

The third edition of *From Sunlight to Electricity: a practical handbook on solar photovoltaic application* brings in the latest information about photovoltaic sector in India, designs and applications of specific devices and related benefits, finance, and policies. This edition of the book gives readers an understanding of the photovoltaic technology programme in India, the issues therein, and its future directions.

The information has been presented in a format that is easy to understand and apply. In this third edition, the author has included topics such as “global development in PV system”, “installation and maintenance of PV systems”, and “application of PV systems for other households”.

### Table of Contents

- Overview of solar photovoltaic programme worldwide
- Components of photovoltaic systems
- Applications of photovoltaic systems
- Designing a solar PV system
- Costing of solar photovoltaic systems
- Installation and maintenance of photovoltaic systems
- Overview of solar photovoltaic programme in India
- International photovoltaic programme
- Annexure I
- Annexure II
- Annexure III
- Annexure IV

## Second Edition **Ecological Meltdown**

*Impact of unchecked human growth  
on the earth's natural systems*

*Editors*

**Asheem Srivastav  
Suvira Srivastav**

2015 • ISBN: 9788179935729  
Pages: 310 • Binding: Hardback  
Size: 160 × 240 mm • Price: ₹550.00

In the second edition of *Ecological Meltdown: impact of unchecked human growth on the earth's natural systems*, the authors discuss the destruction of biodiversity and ecosystems due to human actions. Apart from warning about the impending ecological meltdown and analysing the causes behind it, the book deals with the solutions that need to be urgently adopted by the global civil society and national governments.

The book is an invaluable resource for policymakers and institutions in the forestry, wildlife, energy, rural development, and environment sectors. It will also prove beneficial for conservationists, scientists, researchers, and students of environmental science. A new chapter on "Time for energy transition" has been added in this edition.

### **Table of contents**

- Beyond Limits
- The Fast Breeding Machines
- One Earth, Many Worlds
- Time for Energy Transition
- The (Un) Protected Areas
- Victims of Human Hunger
- Treating Deep Wounds – Is First Aid Enough?
- The Relevance of Multilateral Environmental Agreements
- Revisiting Sustainable Development
